This small efficiently planned bathroom focuses on the quality of the spaces rather than the size. Squeezed into a rooftop cavity with little head clearance the pop up chimney provides room for a shower and light to the bathroom. It also serves as an important passive solar function for the house – acting as a solar chimney where it draws the heat up and exhausts it.

- Recycled Messmate timber joinery
- Omvivo Neo Basin, wall hung from Reece
- Sussex Scala shower and basin mixer from Reece (WELS 5 star)
- Astrawalker shower-arm A67.24.V4 (WELS 3 star)
